

THE GENIUS BANK

The Creative Power of MTV Networks
Now Just a Click Away

It's no secret that MTV Networks harbors the most inventive, artistic, unruly, diverse and yes, best-looking, geniuses in the business. It's part of our creative legacy. But does anyone know who these people really are?

Well, there's you, of course, and the people you work with in your department, and some people you know in other departments in your network. But there's tons of networks, and each has its own band of crazies who turn out fabulously innovative programs, promos, packaging, websites and branded products just like you do. And this is just the stuff they do at work. Many of them create stuff at home that's even more radical.

Now you can meet your fellow geniuses, greet them, see their most groundbreaking work, show them yours, and maybe even work with them on your next project. And you don't even have to leave your desk. Just type in "genius" at the top of your browser and go directly to The Genius Bank, an elegantly simple, state-of-the-art intranet site where you can see everybody's best stuff and upload some of yours.

The Genius Bank lists actual MTVN geniuses in your building and around the world -- their pictures, bios, contact info, and most important, their films, artwork, music, scripts, poetry, performances, photographs, fashion designs, set designs, special effects, or whatever else their devious minds have come up with. These are the visionaries who have made MTV Networks the most creative and provocative producer of new content in television and cyberspace. And they're waiting for you to join them.

Our hope is that The Genius Bank will promote more artistic communication, collaboration, cross-pollinization, inclusiveness and diversity at MTV Networks. It will offer producers a greater creative palette to work with, and afford artists like yourself a chance to have your work more widely seen and utilized. As MTVN continues to expand its networks and digital platforms, the Bank will become a ready resource of new content, content made by all you in-house free-thinkers who help keep the brand authentic and unique.

Most of all, The Bank will further connect us as a creative community and remind us of the rare creative treasure and legacy we share at MTV Networks. So click on The Genius Bank, become a member, and help feed the culture and the digital beast.

The experiments continue....

The screenshot shows a browser window with a search bar at the top right containing the text "Search". Below the search bar is a navigation bar with a search icon, zoom in (+) and zoom out (-) buttons, a page indicator "1 / 20", and left and right arrow buttons. The main content area of the browser displays an article with the following text:

ABSTRACT

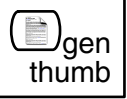

There has been considerable debate over the proper place of journalism education within the academy. We argue that programmes which compromise between vocational training and a broader programme of study based in the liberal arts remain unsatisfactory because they put too much onus on students themselves to bridge the gap between theory and practice. Taking up James Carey's challenge to more precisely locate the object of study, we believe journalism education must begin from a view of journalism as an institutional practice of representation with its own historical, political, economic and cultural conditions of existence. This means that the journalism curriculum must not only equip students with a particular skill set and broad social knowledge, but must also show students how journalism participates in the production and circulation of meaning.

KEY WORDS ■ communication theory ■ critical communication studies ■ political economy of journalism ■ epistemology ■ ethnography ■ journalism education ■ praxis

<div style="border: 1px solid #ccc; padding: 10px; margin-bottom: 10px;"> <div style="border-bottom: 1px solid #ccc; padding-bottom: 5px; text-align: center;">ABSTRACT</div> <p>There has been considerable debate over the proper place of journalism education within the academy. We argue that programmes which compromise between vocational training and a broader programme of study based in the liberal arts remain unsatisfactory because they put too much onus on students themselves to bridge the gap between theory and practice. Taking up James Carey's challenge to more precisely locate the object of study, we believe journalism education must begin from a view of journalism as an institutional practice of representation with its own historical, political, economic and cultural conditions of existence. This means that the journalism curriculum must not only equip students with a particular skill set and broad social knowledge, but must also show students how journalism participates in the production and circulation of meaning.</p> <p>KEY WORDS ▪ communication theory ▪ critical communication studies ▪ political economy of journalism ▪ epistemology ▪ ethnography ▪ journalism education ▪ praxis</p> </div>
